

# Galina Kozyreva

SENIOR SOFTWARE ENGINEER

## Summary

Hello, my name is Galina. I am a software engineer with more than a decade of practical experience in developing and maintaining a wide range of software solutions. Some things I am good at and can bring to the team: knowledge of algorithms and architecture, experience as a team leader, experience in a startup environment. I like to think of myself as language agnostic, however here's a list of the programming languages I've worked with most often: Python, TypeScript, JavaScript, and C++. I'd be happy to learn something new and open to new Challenges.

## Education

### Diploma in Computer Science

**Saint Petersburg State University of Aerospace and Instrumentation, Faculty of Aerospace Computer and Software Systems**

📅 2010 - 2015    📍 Saint Peterburg, Russia

GPA  
1.9 / 1.0

## Work Experience

### Full Stack Engineer

**Flowplace GmbH**

📅 2022-Present    📍 Leipzig

- Optimized the frontend UI to improve UX/UI resulting in increased user engagement.
- Led the development at the Flowplace platform, working with Typescript, Vue.js, Nest.js, Express.js, PostgreSQL, and Prisma.
- Developed an MVP for new features to gather valuable customer feedback for product enhancements.
- Improved the CI/CD pipeline using Github Actions, and DigitalOcean, resolving concurrency issues and enhancing the deployment process.
- Ensured GDPR compliance and fortified IT security throughout the software architecture.

### Research Assistant

**TU Dresden, cfaed – Center for Advancing Electronics Dresden**

📅 2021-2022    📍 Dresden

- Conducted research on MLIR progressive lowering and advanced optimizations for parallel and emerging computing systems, with a focus on C++.

### Senior Software Engineer

**Solactive Technologies GmbH**

📅 2020-2021    📍 Dresden

- Developed a data scraping and processing service for government bonds using Python, Flask.
- Enhance project architecture with a microservice approach and successfully transitioned it to Kubernetes.

## Skills

### Client-Side:

[TypeScript](#) [JavaScript](#) [React](#)  
[Redux](#) [Vue](#) [Next.js](#) [Canvas](#)  
[Tailwind](#) [Bootstrap](#)

### Server-side:

[Python](#) [Pandas](#) [Nest.js](#) [Node.js](#)  
[PostgreSQL](#) [Redis](#) [Prisma](#)

### Cloud Tools:

[AWS](#) [DigitalOcean](#) [Heroku](#)

### DevOps Tools:

[Docker](#) [Kubernetes](#) [Jenkins](#)  
[Terraform](#) [Grafana](#)

### Testing and Integration:

[TDD](#) [Automation Testing](#)  
[CI/CD](#)

## Languages

English    ●●●●●  
German    ●●●●●  
Russian    ●●●●●

- Established system monitoring and error notifications for robust operations.
- Contributed to frontend development using atomic design principles and React.js

## Software Engineer

### Silicon Valley Insight

 2018-2020  remote

- Led diverse web and mobile application projects utilizing a wide range of technologies including React.js, Redux, TypeScript, Next.js, Node.js, Python, Flask, React Native and AWS.
- Managed backend projects and implemented robust software architecture solutions to optimize React Native applications.
- Conducted code reviews and mentored junior developers to enhance code quality and adherence to best practices.

## IT Security Engineer

### State Research Institute of Aviation Systems

 2015-2018  Moscow, Russian Federation

- Defined, implemented and maintained corporate security policies.
- Analyzed and advised on new security technologies and program conformance.
- Configured and setup software and workstations.
- Supported and trained end-users.

## Backend Developer

### Tunnll

 2016-2017  remote

- Developed web applications for finding buses and buying tickets in small cities in Spain.
- Used programming capabilities in Python, Flask, Angular, PostgreSQL, Heroku and Docker.
- Conducted unit testing to deliver optimal browser functionality
- Reviewed code to validate structures, assess security and verify browser, device and operating system compatibility.

## Python / OpenERP Developer

### Scientific and Technical Centre Atlas

 2012-2014  Moscow, Russian Federation

- Maintained the openERP framework and its existing modules.
- Developed new modules to automate the creation of financial documents according to Russian standards.
- Wrote specifications and documentation suitable for government level.
- Tested web application using selenium.

## Web Developer

### Freelance

 2014-2020  remote

- Worked concurrently on several projects.
- Dynamic sites executed by PHP, Python and JavaScript.
- Worked as DevOps with Ansible and Jenkins.

## Certifications

### Usable Security.

University of Maryland, Issued Dec 2016

### Software Security.

University of Maryland, Issued Nov 2017

### Introduction to Cybersecurity Tools & Cyber Attacks.

Coursera, Issued May 2022

### Network Security & Database Vulnerabilities.

Coursera, Issued May 2022

## Further projects

### Christmas Trees

The project is an online Christmas tree shop. I have been involved in the project for 3 consecutive years.

I was engaged in a comparative analysis of the offer of a Christmas tree plantation, management of the import of Christmas trees, preparation for sales (purchase of necessary related products, rental of offices and warehouses, conclusion of contracts with delivery companies in Russia, organisation of delivery to branches), cash accounting and final profit calculation, development of an online store

### Music Festival

The project is a four day open air electronic music festival.

I was engaged in the search for volunteers and management of their work at various venues of the festival, organisation of uninterrupted round-the-clock check and sale of tickets at the entrance to the festival.
